Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a composition of a purified trimer of HIV gp160.

Group II, claim(s) 18 and 19, drawn to a method of producing the trimer.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups I-II appears to be the oligomeric HIV gp160 molecule. Schawaller (U.S. Pat. No. 6,140,059) disclose a method of producing native oligomeric HIV gp160 oligomers (see abstract). Therefore, the technical feature linking the inventions of groups I-II does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

The special technical feature of group I is considered to be the HIV gp160 composition.

The special technical feature of group II is considered to be a method of producing the HIV gp160 trimer.

Accordingly, groups I-II are not so linked by the same or corresponding technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
